

New modifications made to the Web Options program

1. A new OTP system is added to login web options.

Once you enter Roll NO, Rank, Mobile Number and Registration Number, click the Button **getotp** and wait for the response and the **OTP will be send to your Registered mobile. Enter the OTP and click on Submit button.**

If you pres the getopt button without waiting you may get a message "use the otp already sent before requesting for the new OTP".

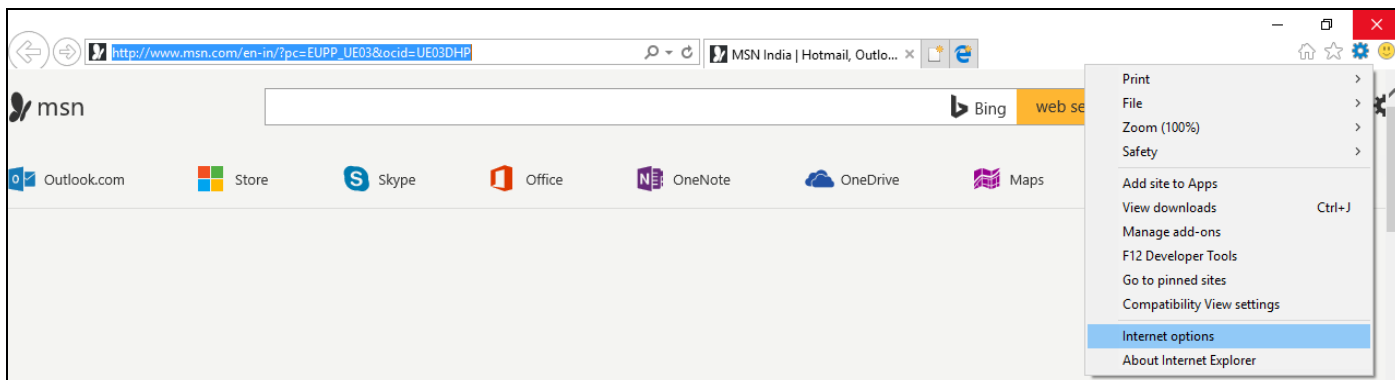

The screenshot shows a web browser window titled "MBBS/BDS Admissions - Internet Explorer" with the URL "http://apmedadm.apsche.ac.in/initopt1.php". The page displays a form titled "Option Form" with the instruction: "Once you enter Roll NO, Rank, Mobile Number and Registration Number, click the OTP Button to get OTP required to login". The form contains input fields for "NEET Roll No", "NEET Rank", "Mobile No", "Registration No", and "OTP", along with a "getotp" button and a "Submit" button.

2. Options once exercised and saved they are freeze automatically and cannot login again for modifications, so you have to be careful in exercising your options. Please write on a piece of paper the **priority of options** and enter in the system.
3. If you want to change the web options contact Help Desk or email.

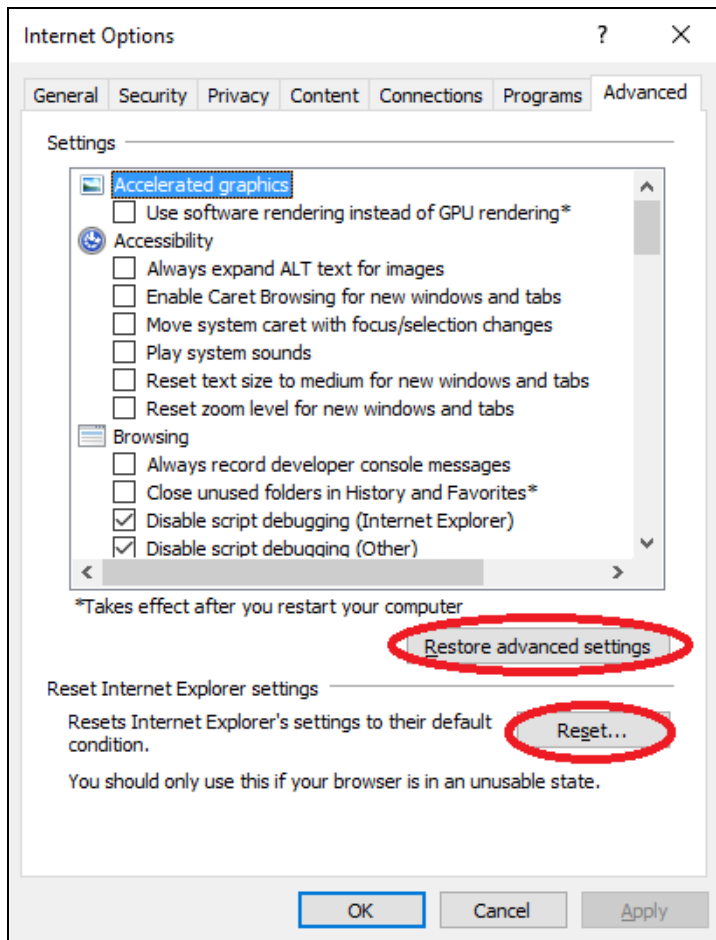

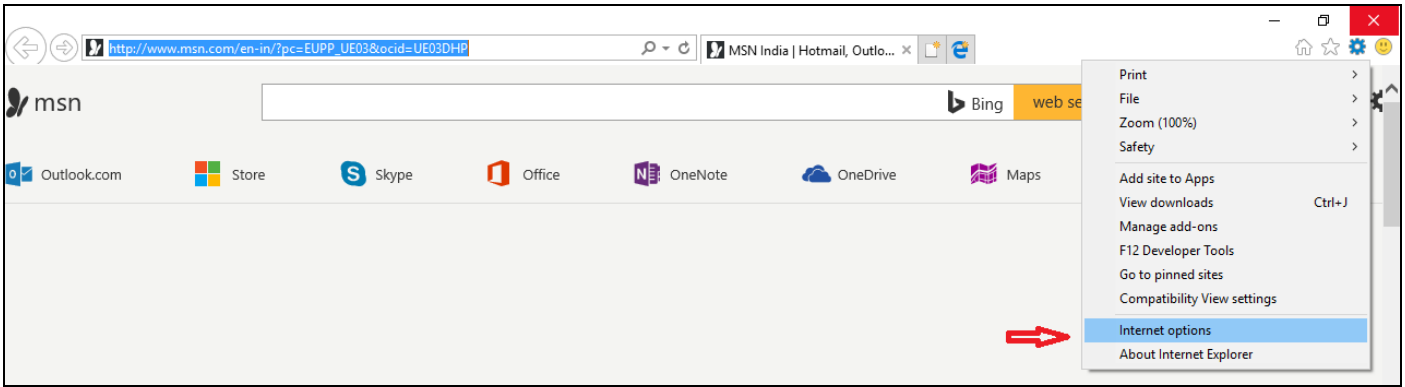

Note: If OTP is not generated and received to your mobile reset your browser by entering into browser settings

Steps to reset your browser

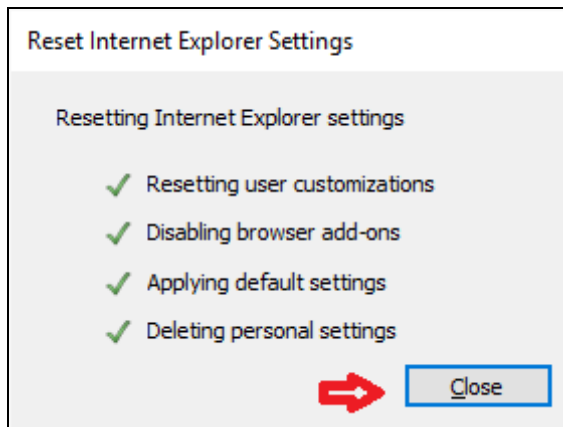

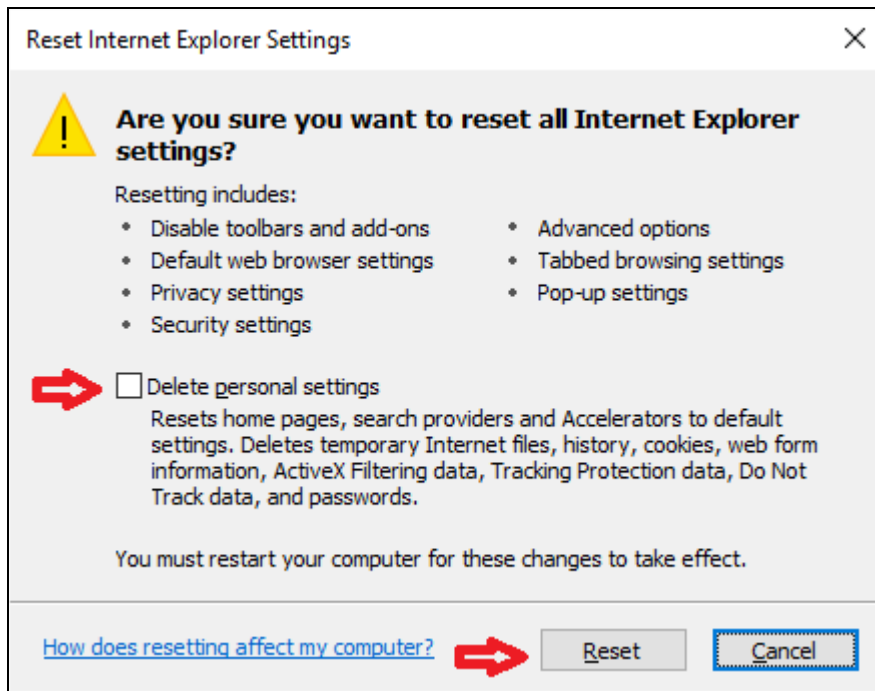

- a. Go to browser settings (Shortcut key to browser settings Alt+ X)

- b. Select internet options
- c. Select advance

- d. Select Restore advance settings and click reset in the same window and select delete personal settings and click reset

e. Close the browser and login again
